

32GB High Capacity Internal Memory

With 32 GB of built in memory, the **WOLFCOM 3RD EYE™** can store up to 21 hours of Video, approximately 20,000 photo images and about 500 hours of audio recordings.

Vehicle HD DVR Video Recorder

The **WOLFCOM 3RD EYE™** can also be used as a vehicle recorder replacing the high cost dash cams that law enforcement agencies currently use today. With its 120 degree field of view the **WOLFCOM 3RD EYE™** captures not only the road in front of the vehicle but the pavements as well. The **WOLFCOM 3RD EYE™** also features a rotating camera mount that allows the officer to reach up and turn the camera completely around to film the back seat. This feature not only makes most detainees behave but is important when video documentation of a suspect in custody in the back seat is necessary. With our low light night vision technology, the **WOLFCOM 3RD EYE™** will capture everything, day or night.

WOLFCOM 3RD EYE™

“PROTECTING OFFICERS AND CIVILIANS”

The **WOLFCOM 3RD EYE™** is a revolutionary HD Audio & Video recording device incorporated into a 2-way radio handset transmitter / receiver.

Replacing a standard radio handset device for the sole purpose of HD video, audio, and photo recording of the interactions of the wearer or user whilst maintaining the functions of a radio handset transmitter / receiver.

At the flick of a switch the unit will begin recording audio and video in **full 1080P HD resolution**. For nighttime recording, the unit features built-in infrared LED's for **Night Vision** that will see and **record in complete darkness**.

Completely Versatile “Because you deserve the best”

Use with your radio

As a Standalone Recorder

As a Car HD Video Recorder

High Resolution Video Quality *1080P Full HD Colour Video Recording up to 60 FPS*

Truly the first of its kind, no other body worn camera can do what this one can. With the ability to record in true HD 1080P, the **WOLFCOM 3RD EYE™** is the highest recording quality body camera recorder in the market today. It's built-in wide angle lens captures more than just the action. With a wide angle field of view combined with HD quality video, playback puts you right in the shoes of the user.

3RD EYE™ Visual Tactical Advantage *"Better to expose your 3rd Eye than your two real eyes"*

The **WOLFCOM 3RD EYE™** can also be used by an officer to peek around corners or into a dark room giving him a safe tactical advantage without exposing his body to harm. An officer can also use it to record video or snap a photo for later analysis of the situation. Our low light capability and infrared Night Vision technology allows the officer to see who is waiting for them in the dark.

12 Megapixel Camera *Photograph Evidence on the spot with GPS Geo Tag*

Arriving at the scene of an accident or crime the **WOLFCOM 3RD EYE™** enables the officer to quickly snap photo images even while the unit is recording video in both night vision and full colour mode. With the included 32GB memory, the **WOLFCOM 3RD EYE™** can store thousands of high quality images instantly. With Built-in GPS Geo Tag Software every file will have time, date, and GPS coordinates stamped into each image file. Each image can then be tracked to the exact time, date, & location the photo was taken.

Coverit Earpiece for discreet listening *Discretion, better than aggression.*

With the **WOLFCOM 3RD EYE™** covert earpiece, you'll be able to discreetly monitor radio traffic without alarming the public or giving away your position during tense situations. The covert earpiece plugs right into the radio cable and screws securely in place. The clear tube design insures clear crisp audio every time. Available in Clear tube or D-ring design. The **WOLFCOM 3RD EYE™** is also compatible with other aftermarket earpieces.

WOLFCOM's Management Software

GPS Geo Tagging *Fix a location to the picture / video / sound recording*

The **WOLFCOM 3RD EYE™** is the very first body worn camera system that incorporates GPS Geo Tag that stamps the longitude and latitude coordinates onto every video and picture file. Frame by frame and picture by picture. When reviewing videos on our software you'll be able to see the route of the video simultaneously on a map next to it and as the video moves so does the dot on the map. This is valuable when reviewing video of a foot or car chase as you'll be able to see the exact route taken as footage of the chase unfolds before you.

Instant Playback with Password Protection *Secure, tamper-proof files, can be replayed, but not edited by user*

The instant playback feature on the **WOLFCOM 3RD EYE™** allows the officer to playback videos and images anytime on the 2 inch colour LCD display. Video can be paused, rewound, and fast forwarded at a maximum of 16x speed. With the screen capture function the officer can pause the video and at the push of a button save the image as a picture. With the password protect feature, only the administrator can delete recorded files, further protecting the user and the recorded.
